PROJECT DESCRIPTION:

The Project consists of removing soil that was contaminated due to a small diesel spill as a result of a vehicle accident on property owned by the United States Bureau of Reclamation. The removal will be done while the work area is dry, and the seasonal wetland swale is not present. The soil will be sampled to a specified depth to determine

if the spill saturated the ground to a depth further than approximately six inches. Soil will be removed from within a surface area of approximately 12-feet by 18-feet. Project elements that affect aquatic resources include removing the soil within an isolated seasonal wetland swale. The Project will permanently impact 0.001 acre of wetland habitat.

PROJECT LOCATION:

The Project is located at the intersection of Kiefer Blvd. and Sunrise Blvd. in Rancho Cordova, located within Sacramento County. The approximate center of the Project area is located at latitude 38.525290°N and longitude 121.243017°W.

PROJECT SCHEDULE:

The Project will begin upon receipt of the Notice of Applicability and will take two days to perform. The Project will be completed by 2 July 2021.

APPLICATION FEE RECEIVED:

\$2,066.00 was received on 18 June 2021. The fee amount was determined as required by California Code of Regulations, title 23, sections 3833(b)(3) and 2200(a)(3), and was calculated as category E - Low Impact Discharges (fee code 87) with the dredge and fill fee calculator.
